## SOLVING THE **CONNECTIVITY CHALLENGE**

We are part of Conextivity Group, a global technology leader in **high-performance connectivity solutions** that manage power and data flows seamlessly from sensors and devices to the cloud, enabling the emergence of new and scalable ecosystems.

wearin'

## What we do:

We capture and process multi-source real time data to provide Line of Command with secure information specifically designed to improve the protection and the coordination of field personnel

# How we do it

## Modular, configurable set-up

Source and Integrate sensors that provide the needed measurements

## Artificial Intelligence

Develop algos that make the best out of diverse data and deliver exactly the information that is needed

## Cloud Management

Securely send, store and manage data in the Cloud

## Web and Android Apps

Develop the tools to visualize the situation (can also work with third parties)

## Hardware and Firmware

Electronic design and embedded software development

## What it looks like:

## Solution | Cash Transport

wearin'

### Real Time Data :

- Position of agents & trucks
- Automatic alarms in case of attack
- Physiological data for forensics
- Monitoring abnormal driving
- Monitoring agents' stress
- Live video feed
- Advanced man down detection
- Active SOS on garment alarm

### Value of the solution:

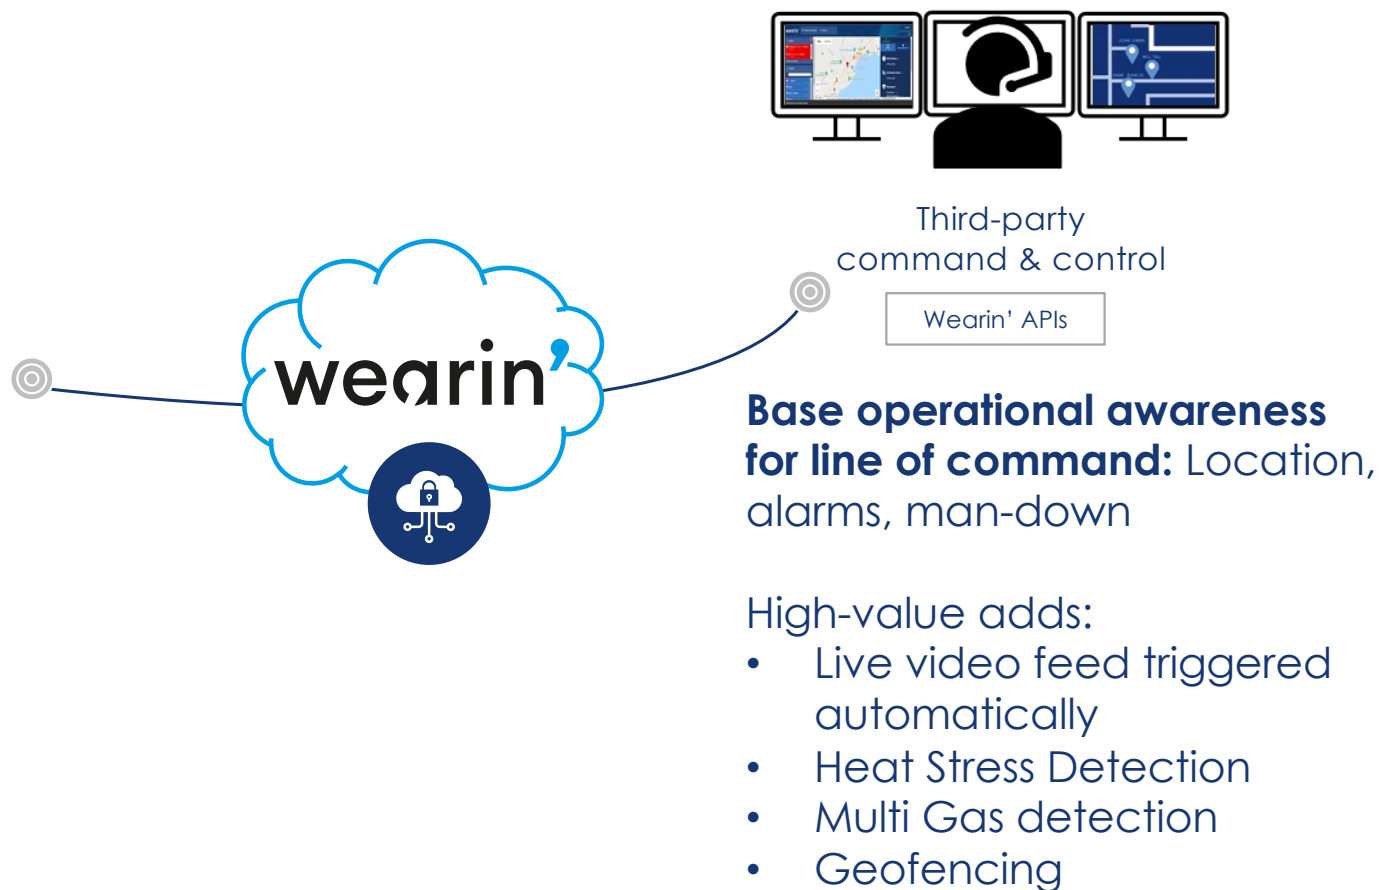

- Immediate attack detection
- Faster response time for sending support
- Deterrent for attackers
- Deterrent for inside accomplices
- Lower insurance premiums
- Great buy in from the employees
- Great buy in from the employers

## Solution | Operational awareness, from lone worker to large events

Private security,  
police, firefighters

wearin'

Solution | Fire Fighters

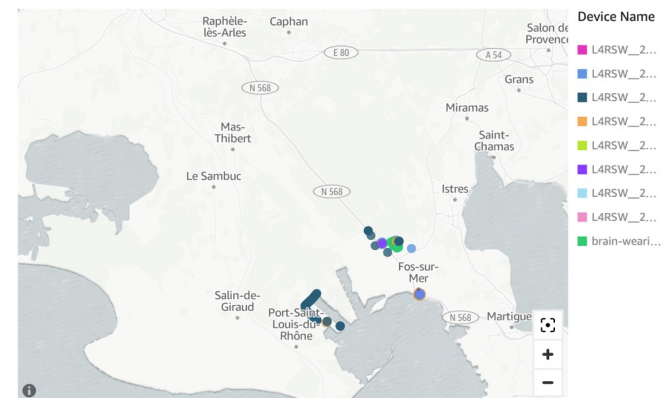

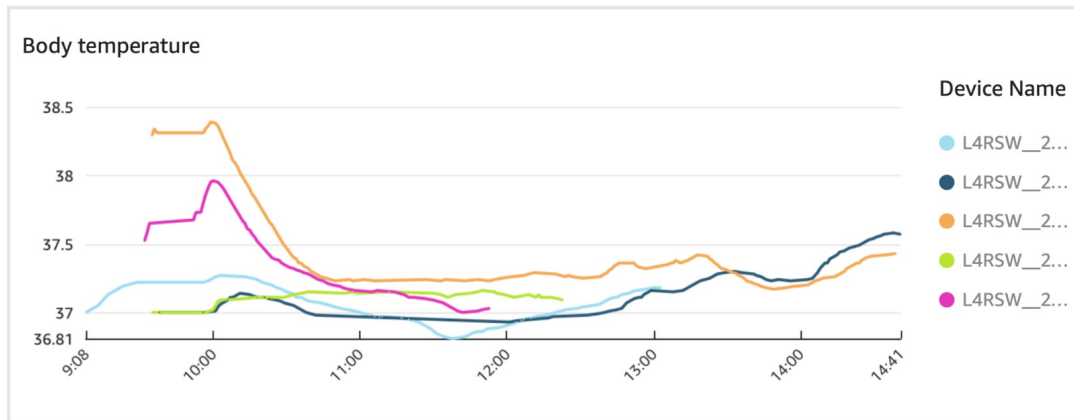

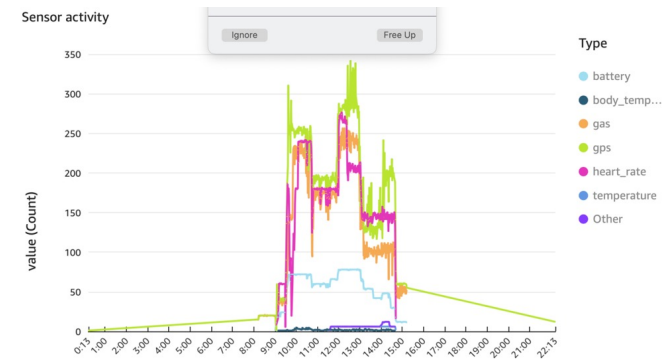

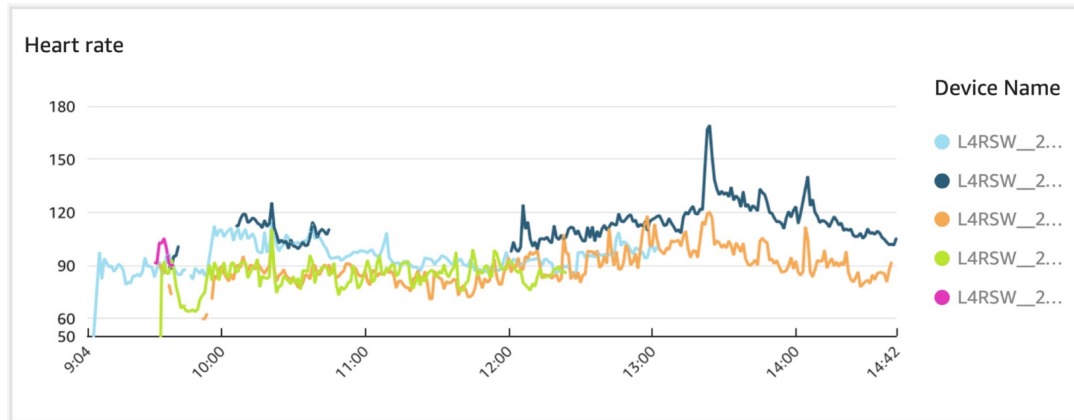

Domino FSX

# The cherry on the cake: all data is stored and available for RETEX, Training, reports

# Verticals addressed

thanks
